### Features

- Large 28 oz. capacity discharge
- Isolated trigger assembly
- Non clogging
- Low profile
- Translucent reservoir
- Full port drain valve
- Fully pneumatic
- Automatic design

**Made in the USA**

### Benefits

- Ideal for most compressor installations
- Reliable design – unaffected by contaminants
- Saves valuable air. Saves money
- Fits in tight spots
- Easy-to-see condensate level “Quick check”
- Handles scale and rust without clogging
- No electricity required
- Operates on demand
How It Works
Condensate enters the drain through one of two inlet connections. As condensate is collected and the translucent reservoir fills, a stainless steel float mechanism rises. When the condensate reaches a design level, the float mechanism actuates an isolated magnetic trigger assembly. The trigger assembly directs control air to the valve actuator, which in turn opens a full-port drain valve.

Condensate will then exit the unit. As the float drops, the trigger assembly closes the control air line and the valve actuator closes the ball valve. The drain is then returned to the collection mode.

Specifications
- Inlets: (2) 3/4" NPT
- Outlet: 1/2" NPT
- Power: Clean, Dry Compressed Air
  80 to 130 PSI
- Pressure: 0 to 250 PSI
- Operating Temperature: 32° to 180° F.
- Weight: 17 lbs.
- Discharge: 24 ounces per cycle

Materials
- Reservoir: Aluminum and Composite
- Valve: Bronze w/S.S. Ball and Stem
- Float: Stainless Steel
- Seat: Stainless Steel
- Seal: Viton®
